

A Visual Tour and Introduction to the AML Search Website Version 2

December 2013

Introduction:

- AML Search V2 builds on the success of V1 and adds a number of new search types following requests from our userbase, providing an enhanced AML Customer Due Diligence system suitable for organisations of all sizes, simplifying and automating the critical task of Customer Due Diligence (CDD) using a risk-based approach.
- We have simplified the input process, as well as making the site compatible with iPhone, iPad, Android phone and tablet, as well as all modern browsers on PC, Mac and Linux.
- Existing users of AML Search can upgrade to AML Search v2 at no cost, if you do not wish to upgrade you don't have to, AML Search will continue to be supported in addition to AML Search v2.
- New International search options allow users to verify the identity of foreign customers from over 150 countries quickly and with confidence.
- New ID Check to check UK customers quickly and with confidence where a full Anti-Money Laundering search is not required.

Risk Profile Creation and Modification (Accessible by MLRO only). All prospective clients can be risk assessed for money laundering and terrorist financing purposes at the start of the relationship according to the perceived level of risk set by yourselves. Additional due diligence can be applied to relationships where there is a greater potential for money laundering or terrorist financing.

AML Search Usage Data:

Search metrics for MLRO's to ensure the appropriate searches are being carried out by staff.

Summary:
